

## 2018 Playlist

### 1. Introduction

#### 2. Thriving with Their Feet Wet 3:47

##### *Media Smith Films*

Pine Barrens Tree Frog are a threatened frog species in New Jersey. Save the Source is a campaign by Pinelands Preservation Alliance to protect the 17-trillion gallon Kirkwood-Cohansey Aquifer, a vast reserve of fresh water that underlies southern New Jersey and all of the Pinelands.

#### 3. Wild Olympics 7:40

##### *Wild Confluence Media*

Paddlers and conservationists Adam and Susan Elliott set out to explore the wild rivers of the Olympic Peninsula.

#### 4. After the Smoke Clears 8:00

##### *Balance Media*

In this film, we visit the stunning landscapes that burned in the Eagle Creek fire in the Columbia River Gorge and hear from local residents, firefighters and scientists about living with fire and threats to the future recovery of our wild and scenic forests.

#### 5. Spasski Stream Restoration 3:29

##### *Ian Johnson*

A summary of work conducted through the Hoonah Native Forest Partnership that engagement multiple agencies and private land owners.

#### 6. The Water's Fine 4:43

##### *Human Access Project*

There's a disconnect between the people of Portland, Oregon and the river that is central to the city. This film calls attention to an organization trying to bridge this gap: the Human Access Project. Film by Atlas Finch, Theo Morris, and Moira Peterson.

#### 7. Not for Any Price 15:06

##### *Northwest Indian Fisheries Commission*

A 15-minute documentary about how the Lummi Nation put their treaty rights on the line and protected natural resources for everyone.

#### 8. Intermission (10 min)

#### 9. Building a Legacy: White Creek Large Woody Debris Project 5:46

##### *Brendan Wells & Yakama Nation*

Video depicting the fall 2017 implementation of the White Creek large wood placement project in the Klickitat River Basin. The White Creek salmon recovery project was implemented by the Yakama Nation sponsored Klickitat Watershed Enhancement Project (KWEP) with funding from BPA.

#### 10. Alice's Garden 9:33

##### *Jenny Plevin & American Rivers*

Meet Venice Williams, executive director of Alice's Garden, a community garden in Milwaukee. Venice shares her connections with rivers and water, and shows how the garden is using innovative water solutions that are a model for other communities nationwide

#### 11. A Creek Once More 8:44

##### *Narrative Lab & USFWS*

In a far-away pocket of Oregon's Crater Lake National Park, a small, stunted population of endangered, native bull trout -- isolated for more than a century -- may once again produce migratory giants when their creek is reconnected through a cattle pasture to 15,000 square miles of waterways.

#### 12. Finding Sanctuary on the North Umpqua: A Veteran's Legacy 4:16

##### *Uncage the Soul*

Sanctuary. There are two primary definitions. One meaning a place of refuge or safety. The other more specifically defined as a protected natural space. Ninety-five year old World War II veteran Frank Moore knows that the two definitions are not mutually exclusive.

#### 13. Blue Carbon: A Story from the Snohomish Estuary 5:47

##### *Benjamin Drummond & Sara Steele*

Blue carbon is carbon that's captured and stored by coastal wetlands, helping to mitigate climate change. This film is about mud and the multiple benefits that estuaries provide for us.

#### 14. Renewal: Think Like a Scientist 7:42

##### *Plumb Productions*

Featuring an emerging scientist from the Lower Elwha Klallam Tribe, Renewal is a heart-warming story of transformation and restoration. Supported by HHMI and Tangled Bank Studios, this short film is part of HHMI's "Think Like A Scientist" series. It is also a follow-up to a feature film by the same Producer, chronicling the largest dam removal in history.
